

Niagara4 Technical Certificate Datasheet

**Certified
Tridium Niagara 4
Training - Locally by
EnergyCare**

EnergyCare are experts with the Niagara 4 framework and authorized Tridium training partners.

A comprehensive training for Systems Integrators, OEMs and other business partners. This is part of the global Tridium Certification Programme; involving a combination of theory and practical workshop-style activities.

We offer a detailed introduction to the Niagara 4 Framework for engineers, exploring the capabilities of the Framework and it's application in building automation systems on a 5 days course that includes:

- Workbench engineering
- Drivers & various communication protocols
- Creating control strategies
- Drawing web serving graphics
- Creating & managing Niagara stations

If you need more information than provided here or have special training requirements then please contact us.
